WORK EXPERIENCE

AI SOFTWARE ENGINEERING

Toronto, ON

Humber River Health

Jan 2026 - Apr 2026

- Built a full-stack AI chatbot to support 700+ hospital staff by troubleshooting login, network, printer, email, and VPN issues, with escalation logic to route unresolved cases to IT support.
- Developed an AI voice agent prototype for hospital call centre automation, using speech-based intent detection, department mapping, routing rules, and on-call physician lookup workflows to improve caller triage.
- Engineered a Retrieval-Augmented Generation pipeline using official hospital procedure documents, enabling accurate, grounded, step-by-step support responses instead of generic chatbot outputs.
- Conducted staff interviews and analyzed call and ticket data to identify high-volume support issues, workflow bottlenecks, automation opportunities, and user requirements.
- Presented prototype demos and implementation recommendations to senior leadership, connecting technical design decisions to operational efficiency, staff experience, and business impact.

APP DEVELOPER

Markham, ON

Career Education Council

Sep 2024 - Jan 2025

- Developed an iOS health-monitoring app using Swift, Xcode, HealthKit, and Apple Watch data to track heart rate patterns and flag potential Supraventricular Tachycardia episodes.
- Implemented threshold-based alerting and episode tracking to display timestamps, episode duration, and peak BPM values in a clear, patient-friendly interface.
- Applied UI/UX, branding, and product development principles to design a functional health technology prototype built around real user needs.

EXTRACURRICULAR EXPERIENCE

ENGINEERING AMBASSADOR | University of Waterloo

May 2026 - Present

- Represent the University of Waterloo Faculty of Engineering as a student ambassador, supporting recruitment and outreach initiatives for prospective students and families.
- Engage with high school students through tours, events, shadow days, and virtual chats to share insight into engineering academics, co-op, campus life, and student experience.
- Support prospective students' decision-making by answering questions, sharing resources, and creating a welcoming introduction to Waterloo Engineering.

PRESIDENT OF STEM EDUCATION TEAM | Unionville High School

Sep 2023 - June 2025

- Led STEM outreach workshops for 1,000+ students across elementary schools.
- Designed hands-on activities using Micro:bits and curriculum-based science experiments to make STEM concepts more engaging.
- Trained new executives to lead workshops, communicate effectively, and support club events.
- Coordinated with teachers, managed social media promotion, and partnered with other clubs for collaborative events.

SHAD CANADA | Toronto Metropolitan University

Jul 2024

- Participated in Shad Canada, a competitive month-long STEAM and entrepreneurship program hosted at Toronto Metropolitan University.
- Collaborated on a team design project to develop a renewable energy product for heating water in homes.
- Attended engineering-focused lectures, workshops, and professional development sessions.

SKILLS

Languages: Python, C++, Swift, Java

AI / ML: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Conversational AI, NLP, Anthropic Claude API

Infrastructure & Tools: Docker, Nginx, REST API, FastAPI, ElevenLabs, Retell AI, Cursor, VS Code, SolidWorks, GitHub, Microsoft Office, Google Suite

EDUCATION

UNIVERSITY OF WATERLOO

Candidate for Bachelor of Applied Science in Honours Systems Design Engineering

Sep 2025 - Present
